

# **SKILLS 100**

# **S100 TOKEN**

WHITE PAPER

# ABOUT S100 TOKEN

The innovative project, SKILLS 100, boasts an array of practical utility products that are bound to captivate users across the crypto community. This is poised to have a favourable impact on the token price, potentially driving it up.

S100 token is the best solution today.

Our project is very simple, investors are divided into two types, the first ones buy a token to make money on a rapidly growing exchange rate, the second ones to purchase courses that teach how to handle cryptocurrency at a professional level, thereby giving away the purchased coins that we burn to increase the value of the token.

# Why should I own \$S100 Token?

## **Immediate Incentive for Usage**

Holders of \$S100 receive a 1% \$S100 reward for each transaction conducted by active users, promoting equitable network distribution and community engagement. The frequency of rewards increases in tandem with SKILLS 100 usage, creating a mutually beneficial incentive structure

## **Safe and Secure**

The \$S100 smart contract will undergo a comprehensive audit conducted by a leading specialist team, Ace Audit, and its LP (Liquidity Pool) tokens.

## **Renounced Ownership**

We have resolved to relinquish ownership of SMC, and the team did not retain any tokens. This token now belongs entirely to the community.

## **Course database**

We offer the largest database of training courses related to cryptocurrency and blockchain. And most importantly, at the best price. Using the S100 token you get a 50% discount on any product of the company.

## **Fast development**

At the moment, more than 20 courses are already available that can be purchased for both USDT and Skills Token at a reduced price. But this is only the beginning of our journey, we plan to add new categories of courses related to work in the field of finance, such as: - stocks, stock markets, arbitration, etc...

## **Best price**

We have developed an easy pricing system for our project, you can buy one course for \$100, or buy access to the entire database for \$500. And most importantly, when paying with S100 tokens, you pay half as much.
